SQL to PySpark Phase 2 – Revised Bridge Pack

Reading the CUSTOMERS AND SALES DATA

```
df=spark.read.format("csv").option("header",True).option("inferSchema",True).option("delimiter",",").load("/Volumes/workspace/default/customers")
df.display()
```

> df: pyspark.sql.connect.dataframe.DataFrame = [customer_id: string, first_name: string ... 7 more fields]

Table

```
df=spark.read.format("csv").option("header",True).option("inferSchema",True).option("delimiter",",").load("/Volumes/workspace/default/sales")
df.display()
```

> df: pyspark.sql.connect.dataframe.DataFrame = [Item_Identifier: string, Item_Weight: double ... 10 more fields]

Table

;
