

Databricks Training Output Report

Single PDF containing SQL and PySpark output summaries for every phase.

Phase 1 - Filtering and Selection

SQL output

```
SQL output summary: customer_id=1 | John | Springfield
```

PySpark output

```
PySpark output summary: 3 rows selected from the customer dataset
```

Phase 2 - Joins and Aggregations

SQL output

```
SQL output summary: customer 2 spent 115.94 across 2 orders
```

PySpark output

```
PySpark output summary: aggregated spend by customer
```

Phase 3 - ETL and Cleaning Pipeline

SQL output

```
SQL output summary: customers 50 -> 50, orders 60 -> 60
```

PySpark output

```
PySpark output summary: 110 rows loaded and retained
```

Phase 4a - Bucketing and Segmentation

SQL output

```
SQL output summary: Gold 3 | Silver 6 | Bronze 41
```

PySpark output

```
PySpark output summary: bucketed customer segments
```

Phase 4b - Data Cleaning Pipeline

SQL output

```
SQL output summary: cleaning pipeline completed with 110 rows
```

PySpark output

```
PySpark output summary: report rows queued successfully
```
